Denny Jiosa is recognized and respected worldwide as one of the most dynamic and soulful guitarists on the scene today. Jiosa has always pushed the envelope stylistically, swirling in the style of smooth Wes Montgomery- inspired playing; to soaring Santana-esc solos; to Jeff Beck technical prowess. Pushing the envelope even further, his 2018 release, **"MUEVE TU CUERPO"** is a Latin jazz/rock influenced project featuring soaring guitars, dynamic horns, and alluring vocals. He is best known for his six smooth jazz projects, all garnering top 5 positions on the smooth jazz charts, as well as delivering his hit song **"Lights of The City"**, and his number 1 hit single, **"Wounded Warriors"**, in the UK in 2014. He is equally at home in the studio as a renowned producer and engineer. With four Grammy nominations to his credit, his production skills range from Americana, rock, blues, latin, and jazz! He has worked with artists such as gospel sensation **Yolanda Adams**, master guitarist **Phil Keaggy**, the late **Bobby Hebb** (Sunny), saxophonist **Kirk Whalum**, drummer **Chester Thompson** (Genesis, Santana), country star **Crystal Gayle**, **Phillip Bailey**, **Ronnie Laws**, and **Take 6**. Denny Jiosa and his band deliver enough energy to power a fleet of rockets. It's a fuel that burns full-throttle, ignited by the heat of the soulful voice of his guitars and the power and passion of his performance. Jiosa is a master at twisting meticulous melodies and soulful ambiance from the guitar, bringing the audience to their feet one minute, and to heartfelt tears the next.
